

# RDS MFA Activation

## Quick Start Guide

for Apple devices

### 1 Visit RDS Website

On your desktop, go to the Retiree Drug Subsidy public website.

[www.rds.cms.hhs.gov](http://www.rds.cms.hhs.gov)

Select **Manage MFA Settings** in the upper right corner of the page.

### 2 Set Up Secure Key

Use the Google Authenticator app on your device to **scan the QR code** displayed on your desktop (found on the Activate Multi-Factor Settings page).

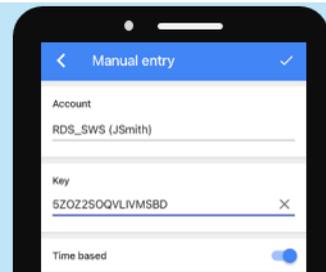

- Click the **Plus icon** and select **Scan a barcode**
- Aim your device's **camera** at the screen so the QR code fits inside the viewfinder
- Google Authenticator will scan it automatically

*Trouble scanning? Try manual setup:*

- On your desktop, click the **gray box** to reveal your Key
- In Google Authenticator, select **Manual Entry**
- Enter **RDS\_SWS (your RDS username)** in the Account field
- Enter **your Key** into the Key field
- Keep the **Time Based** toggle on
- Click the **Checkmark icon** to add

Select this box if you are having trouble scanning the barcode.

If you have a problem scanning the barcode with your device, enter this key manually into Google Authenticator of your chosen device.  
Secret Key: **5Z0Z25OQVLIVMSBD**

### 3 Validate Information

Verify your RDS account by entering your **registered** account information. Click **Continue**.

**Note:** If you have not yet registered your account, please **register** before proceeding. Refer to [Registration](#).

### 4 Optional: Register a Text-Enabled Device

Select **Continue** to register your mobile or text-enabled number. This is optional.

Select **Skip** to proceed to MFA activation without registering a device. Proceed to Step 4.

If registering a text-enabled device, enter the phone number and click **Send Verification Code**. Enter the code sent to your device into the **Verification Code** field and click **Submit**. The code expires after 10 minutes.

*Why should I opt-in to receive SMS/texts from RDS?*

- If you cannot log in to the RDS site due to MFA issues, you can request a **1-Time Token** as a single-use alternative to gain temporary access to your RDS account.
- Because the token code expires after 10 minutes of being sent, most users prefer to receive the 1-Time Token as a SMS/text rather than email. Refer to the **Backup Option: 1-Time Tokens** box below for more information.

### 5 Use Secure Key

On your desktop, **enter the 6-digit code** shown in the Google Authenticator app. The code will change every 30 seconds.

Click **Activate** before it changes. If the code changes, simply re-enter the new code and click Activate.

### 6 You're all set!

You have successfully set up Multi-Factor Authentication for your RDS account!

Select **Continue** to log in.

Use the unique code displayed in Google Authenticator on your device **each time** you log in to the RDS Secure Website.

### 7 Install App & Sync Time

On your mobile device, install and open the Google Authenticator app from the App Store.

Configure automatic time update/sync from within your device settings:

- Select **Settings**
- Select **General**
- Select **Date & Time**
- Toggle on **Set Automatically**

### Backup Option: 1-Time Tokens

- RDS offers [1-Time Tokens](#) as a backup option in case you are unexpectedly having MFA issues and cannot login using your Google Authenticator code
- 1-Time Tokens are NOT intended to replace your personal MFA code**

You can receive a 1-Time Token via SMS/text if you have registered a text-enabled device with RDS

If your text-enabled device is lost or unavailable, RDS can send a 1-Time Token to your registered RDS email address

- Users cannot login using a 1-Time Token more than 3 consecutive times
- If you're having recurring MFA issues, please contact [CMS' RDS Center](#)

# RDS MFA Activation Quick Start Guide

for Android devices

## 1 Visit RDS Website

On your desktop, go to the Retiree Drug Subsidy public website.

[www.rds.cms.hhs.gov](http://www.rds.cms.hhs.gov)

Select **Manage MFA Settings** in the upper right corner of the page.

## 5 Set Up Secure Key

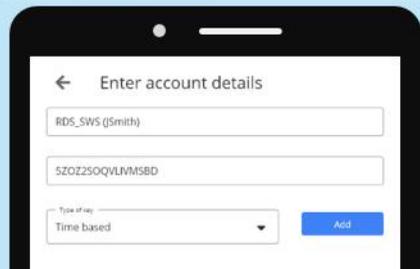

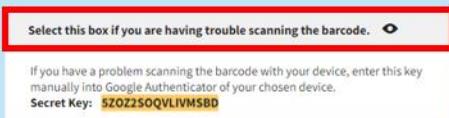

Use the Google Authenticator app on your device to **scan the QR code** displayed on your desktop (found on the Activate Multi-Factor Settings page).

- Click the **Plus icon** and select **Scan a QR code**
- Aim your device's **camera** at the screen so the QR code fits inside the viewfinder
- Google Authenticator will scan it automatically

*Trouble scanning? Try manual setup:*

- On your desktop, click the **gray box** to reveal your Key
- In Google Authenticator, select **Enter a setup key**
- Enter **RDS\_SWS (your RDS username)** in the Account field
- Enter **your Key** into the Key field
- Select **Time Based** from the drop down
- Click **Add**

## 2 Validate Information

Verify your RDS account by entering your **registered** account information. Click **Continue**.

**Note:** If you have not yet registered your account, please **register** before proceeding. Refer to [Registration](#).

## 3 Optional: Register a Text-Enabled Device

Select **Continue** to register your mobile or text-enabled number. This is optional.

Select **Skip** to proceed to MFA activation without registering a device. Proceed to Step 4.

If registering a text-enabled device, enter the phone number and click **Send Verification Code**. Enter the code sent to your device into the **Verification Code** field and click **Submit**. The code expires after 10 minutes.

*Why should I opt-in to receive SMS/texts from RDS?*

- If you cannot log in to the RDS site due to MFA issues, you can request a **1-Time Token** as a single-use alternative to gain temporary access to your RDS account.
- Because the token code expires after 10 minutes of being sent, most users prefer to receive the 1-Time Token as a SMS/text rather than email. Refer to the **Backup Option: 1-Time Tokens** box below for more information.

## 6 Use Secure Key

On your desktop, **enter the 6-digit code** shown in the Google Authenticator app. The code will change every 30 seconds.

Click **Activate** *before it changes*. If the code changes, simply re-enter the new code and click Activate.

## 7 You're all set!

You have successfully set up Multi-Factor Authentication for your RDS account!

Select **Continue** to log in.

Use the unique code displayed in Google Authenticator on your device **each time** you log in to the RDS Secure Website.

## 4 Install App & Sync Time

On your mobile device, install and open the Google Authenticator app from the Play Store.

Open the app and click on the **menu** at the upper-right corner.

- Select **Settings**
- Select **Time correction for codes**
- Select **Sync now**

## Backup Option: 1-Time Tokens

- RDS offers [1-Time Tokens](#) as a backup option in case you are unexpectedly having MFA issues and cannot login using your Google Authenticator code
- 1-Time Tokens are NOT intended to replace your personal MFA code**

You can receive a 1-Time Token via SMS/text if you have registered a text-enabled device with RDS

If your text-enabled device is lost or unavailable, RDS can send a 1-Time Token to your registered RDS email address

- Users cannot login using a 1-Time Token more than 3 consecutive times
- If you're having recurring MFA issues, please contact [CMS' RDS Center](#)
