RDS Secure Website Modernization

- CMS' RDS Center is modernizing the RDS Secure Website interface with the goal of designing an intuitive, easy to use, empathic system based on Plan Sponsor values, while also considering the needs of the Vendors who support many of them.
- In 2018, CMS' RDS Center first announced the Secure Website Modernization project and conducted our first Webinar and feedback session.
- In 2019, CMS' RDS Center recruited volunteers to participate in Listening Sessions to better understand the needs and wants of our users.
- In 2020, CMS' RDS Center recruited volunteers to participate in Usability Testing Sessions to obtain feedback on our early designs.
 - During the presentation, you'll see thought bubbles containing direct feedback from our Plan Sponsor & Vendor community captured during those sessions.
- 2021: Listening Session Demo & Additional User Events

"This is more simplified than the current site."

RDS Secure Website Modernization

- The modernized Secure Website will have:
 - New intuitive design
 - Modified screen flows for all sections of the application
 - Fewer number of steps for most processes
 - New and improved functionality
 - Streamlined Application Submission Process, Payment Setup, and Reconciliation flows
 - Fewer Confirmation and Verification screens
 - Updated Page Messaging
 - Copy a previous year application
- Updated educational materials including User Guide documentation and other support materials.

RDS Secure Website Modernization

- The project has an estimated implementation in early 2022.
- The RDS Secure Website Modernization project is still underway. The screens and flows you see today may change slightly based on user feedback and continuing development activities.
- Today we'll be demonstrating new Secure Website pages and flows and asking polling questions throughout the presentation. Your feedback will help us design a website that gives you the best user experience possible!

“The flow is a lot more smooth. It's a nice upgrade and a lot more user-friendly.”
